Subject: RE: Variance Document

Hi Lindsay,

Thanks. We don't currently have any questions on your comments related to the variance authorizing provision or the MDV rule language and are making a number of changes based on the comments. Hopefully the variance document will make it easier to comment on some portions of the MDV rule language that you weren't able to comment on previously.

One more question – the next (and last) advisory committee meeting will be on the morning of August 1 in Salem. I know at some point you mentioned coming in person, so I wanted to give you as much a heads up in case you still wanted to drive down here.

Thanks,

Aron Borok

Subject: RE: Variance Document

Thanks Aron! I just got back into the office today after being gone for most of last week. A three week turn around time is extremely tight and we'll see what we can do. I haven't had a chance to review this at all, but hopefully if all of the comments on the CWS drafts were addressed that should make this review easier.

On a similar note, were there any questions on the comments we sent regarding the variance authorizing provision?

Hi Lindsay,

Please share this document with others, instead of what I just sent. This one notes that it is a draft document.

Thanks,

Subject: Variance Document

Hi Lindsay,

Attached please find a draft variance document supporting the mercury multiple discharger variance for the Willamette Basin. If possible, we would like EPA's review and comment before the advisory committee meeting on August 1; however, we understand that it may take a little longer, but we'd prefer having it no later than August 2 so that we can incorporate any comments before the beginning of our public comment period on September 16.

There are a lot of components in the document that are similar to what you've already reviewed for the Clean Water Services variances, so a lot will be familiar. Hopefully that will streamline your review to some extent.

Please let me know if you have any questions.

Sincerely,

Aron Borok
